## CARRIER SUMMARY

Passionate Web Developer with 2.5+ year professional experience, seeking a challenging position in any reputed organization where I can use my knowledge & skills effectively and can have an upward career movement.

## PROFESSIONAL EXPERIENCE

Company Name Thesoftking Ltd  
Designation Laravel And WordPress Developer  
Location House# 60, Road# 20, Sector 11, Uttara, Dhaka  
Time Period June 15, 2017 to January 2019

I was started my professional career with Thesoftking. I was joined here as a WordPress plugin developer. I had written my first Laravel application in that time. All of their products and projects are related to digital wallet or online banking. I had to integrate more then 50+ payment API like (Paypal Standerd, Paypal pro, Braintree, Authorized.net, Paystack, Coinbase, Coinpayments, Coingate, Stripe, Mollie, Vogupay, Bkash, SSLCommerz) etc. My responsibilities was-

1. Develop and maintain WordPress plugin and Laravel PHP applications as per clients requirements.
2. Research and add new features to existing products.
3. Problem solving and fixing bugs.
4. Update existing product.

Company Name Walletmix Ltd  
Designation Software Developer  
Location House# 2B, Road# 08, Nikunjo 2, Dhaka  
Time Period February 02, 2019 to Current

Walletmix Ltd is one of the best payment gateway service provider in Bangladesh. They have also Bulk sms and recharge service. They are working with NCC Dhaka for some latest Govt projects like (Shobardhaka, Bazar Dor) etc. They have more then 500+ business partner in Bangladesh. I have joined here as a Software Developer. In walletmix, my first project was to built a ISP management with Radius server (Radius server is using for network request authentication, authorization and accounting). After some days from it's first release, I have released another version with Mikrotik routerOS API support. Currently, I am working on a project Shebanin.com (like sheba.xyz) as Lead. It is a service based ecommerce. My responsibilities is-

1. Develop and maintain full products or projects, develop a particular feature of a application, research and work with verious external API. Support their existing products.

# Professional Portfolio

**Github:** <https://github.com/yousuf-hossain-shanto> (For private repo access, please contact with me)

**Link:** <https://github.com/yousuf-hossain-shanto/walletmix-sms-channel> (laravel notification channel package)

**Link:** <https://github.com/yousuf-hossain-shanto/shebacart> (Laravel cart package)

**All Works:** <https://www.yhshanto.com/portfolio>

**Project Name:** Shebanin

**Client:** shebanin.com

**Url:** <https://shebanin.com>

**Keywords:** Ecommerce, Cart, Wallet, Api, Laravel, PHP, Vue JS

Shebanin is actually a service based ecommerce where anyone can order a service with a schedule. The concept of Shebanin is like Sheba.xyz.

**Project Name:** Robi Binge

**Client:** Robi Axiata Limited

**Url:** <http://binge.walletmix.biz/login> (Demo)

**Keywords:** Distribution, Api, Laravel, PHP, Vue JS

Binge (Actually Robi Binge) is a upcoming project by Robi Axiata Limited. The concept of Binge is like Robi Digital Distribution Project. From that link and using this credentials (username: admin@gmail.com, password: SuperAdmin@1) you can get a idea of this project.

**Project Name:** Shobardhaka

**Client:** Dhaka North City Corporation

**Url:** <http://shobardhaka.com/management>

**Keywords:** Citizen App, Api, Laravel, PHP, Vue JS, Geomap

Shobardhaka actually a citizen service android app for Dhaka North City Corporation. We have integrated a complex govt. employee management and complain process with it. For details credentials please let me know, because it is very confidential.

**Project Name:** Singleisp

**Client:** Product

**Url:** <https://singleisp.com>

**Keywords:** ISP, Mikrotik, Router, Radius, Server, Inventory, Expense, Complain, ERP

Singleisp is specially developed for Internet Service Providers. Actually it is an ERP solution for ISP. Main modules of this Software is Radius server (a server application that is using for network authentication, authorization and accounting, link: <https://en.wikipedia.org/wiki/RADIUS>), Mikrotik API, Billing automation, Inventory, Earnings and expenses management, Complain management, Integrated Wallet, Android and IOS application, User module, BTRC report etc. I had to work with RouterOs (RouterOS is the operating system of RouterBOARD) in this project. I also developed an UDP server using python and mysql to receive and manage logs form routers like Mikrotik or Cisco.

**Project Name:** WP-Mailer (Email Marketing Wordpress Plugin)

**Client:** Codecanyon

**Url:** <http://wp.microtriangle.com/promo-mail>

**Keywords:** Marketing, Promotion, Email, WordPress, Plugin, PHP, Queue, Schedule

WP-Mailer is simple email marketing WordPress Plugin. You can set a email campaign for your WordPress dashboard easily. You can also track your emails read unread status. It is lightweight, easy to use, no other dependency. Actually it is working with SMTP, Its support multiple SMTP with IP Rotation system. It also support both plain text and HTML email format. However, WP-mailer is strong useful and painless WordPress Plugin for email campaign including A to Z email campaign report.

**Project Name:** Socialon (Social Networking Platform)

**Client:** Product

**Url:** <http://lab.thesoftking.com/socialon>

**Keywords:** Social Network, PHP, Laravel, Vue Js, Queue, Wallet, API

Socialon is the best social network product to create a niche community or social Networking Website. It is features packed, highly configurable. Socialon is mobile-friendly, it is easily accessible through mobile web or Android and iOS mobile apps. A digital wallet has integrated with it. People can register here and post a writing, or a video, share a link, share any type of file and get paid for their post. They also can sell and buy product through platform. A simple multi vendor ecommerce is integrated.
